PROFESSIONAL OBJECTIVE

Final-year CSE student with hands-on experience in full-stack web development, machine learning, and computer graphics. Experienced in developing responsive web applications, integrating APIs, and implementing modern UI/UX practices. Adept at working with both frontend and backend technologies and committed to delivering clean, efficient, and maintainable code.

SKILLS

Web & Mobile Development

- Full-Stack Web Development (HTML, CSS, JavaScript, PHP, SQL, Node.js, ES6+)
- Responsive Web Design & Mobile-First Development
- Component-Based Architecture (React.js)
- API Integration & Dynamic Data Handling

AI / ML & Data

- Machine Learning & Deep Learning Fundamentals
- Computer Vision & Image Processing
- Data Analysis & Visualization (NumPy, Pytorch, Matplotlib)

Tools & Concepts

- Object-Oriented Programming (C++, Python)
- Database Management (SQL)
- Version Control (Git & GitHub)
- UI/UX Design Principles
- Problem Solving & Code Optimization

EDUCATION

BSc in Computer Science and Engineering
American International University-Bangladesh (AIUB) *Expected Graduation: 2026*

Higher Secondary Certificate (HSC)
Shaheed Ramiz Uddin Cantonment College *GPA: 5.00 / 5.00 | 2021*

Secondary School Certificate (SSC)
Haydarabad Ramoni Kumar Pait High School *GPA: 5.00 / 5.00 | 2019*

PROJECTS

TradeBay – Online Shopping System — *HTML, CSS, JavaScript, PHP, SQL* GitHub

- A full-featured e-commerce web platform designed for seamless online buying and selling, with user authentication, product listings, and order management.

Green Earth Shop – Plant Nursery Website — *HTML, CSS, JavaScript* GitHub

- An interactive e-commerce website tailored for plant enthusiasts with responsive design and modern UI/UX principles.

React Web Application — *React.js* GitHub

- A modern UI-focused application built using component-based architecture with dynamic data rendering and clean design.

Emergency Directory System — *HTML , CSS , JavaScript* GitHub

- A localized emergency service directory for quick public access with intuitive interface and search functionality.

Flower Shop – Responsive Landing Page — *HTML, CSS* GitHub

- A boutique flower shop landing page with modern UI/UX principles, mobile-first responsive layout, and elegant styling.

Monsoon Scene – OpenGL Graphics Project — *C++, OpenGL* GitHub

- A 3D animated environment simulating a rainy city atmosphere with real-time rendering and dynamic visual effects.

Ticket Management System — *HTML, CSS, JavaScript, React.js* GitHub

- A ticketing system with real-time status tracking and dynamic counters for efficient customer support management.

Hero.IO — *React.js* GitHub

- A modern app discovery platform featuring live search, download-based sorting, interactive rating charts, and app installation management.

RESEARCH & PUBLICATIONS

Traffic Sign Detection in Low Light: Improved LLE-STD Using YOLOv8m

- Proposed a two-stage low-light traffic sign detection framework integrating Zero-DCE++ image enhancement with an unchanged YOLOv8m detector.
- Achieved Precision: 92.8%, Recall: 87.8%, mAP50: 91.9%, F1: 0.9023 on CNTSSS night-only dataset — outperforming YOLO-LLTS (81.0% F1) and LLE-STD (82.30% F1).
- *Keywords: Zero DCE++, YOLOv8, Small Target Detection, Computer Vision, Deep Learning.*

CORE COMPETENCIES & PERSONAL ATTRIBUTES

Core Competencies

- Strong analytical mindset with problem-solving ability
- Self-motivated and quick learner
- Adaptable to new technologies and changing environments
- Detail-oriented with a focus on clean and efficient work
- Strong communication and presentation skills

Personal Attributes

- Responsible and deadline-conscious
- Ability to work independently and in a team
- Positive attitude with continuous improvement mindset
- Strong time management and organizational skills
- Committed to professionalism and integrity

Languages

- Bangla — Native | English — Professional Working Proficiency
